

Bunk Bed Double Mattress

Breasley UNO Revive Memory Foam Mattress

Breasley are the largest foam producers in the UK and put their experience and know-how to make some superb mattresses.

The all new Uno Revive is designed to offer a supportive, comfortable feel at all times. There are 2 layers of foam in this mattress, there is the foundation layer, a 13cm layer of high density foam, designed to offer excellent support to the body at all times. Then there is also a 3cm layer on the surface, which is softer, more comfortable and designed to create the feel of weightlessness whilst in bed. The two layers work in harmony to prevent pressure points from forming, which cause aches and pains in the morning.

The Revive has been infused with Fresche® technology. This new feature to Breasley's mattresses will prevent bacteria from spreading in the mattresses, killing off germs and odours. The cover fabric is a tactile, high quality cover that is silk smooth and very soft. Not only is the cover very comfortable, but it is also machine washable and completely removable.

The UK's 'numero uno' for vacuum packed mattresses

uno

Revive

Comforting. Pressure relieving. Advanced technology.

- memory foam
- ergonomic design
