

# Fire Exit Procedures

We have never had a fire in the building and had to quickly exit the building.  
However, there is always a first time.

**Simply,**  
**if you notice a fire / smoke / anything that indicates a fire,**  
**please get out as soon as possible.**

**Two ways of getting out of the building:**

- 1. The side door next to the kitchen table (You need two keys)**
- 2. The back (main entrance) door you came in**

It is regulations that mean we put a  
**In Kitchen : BS EN 1869:1997 approved fire blanket**  
**In Kitchen : A dry powder fire extinguisher**  
and if you find cause to use them, please do.

**However, we don't want you wasting time in the apartment when you  
should be getting out to safety.**

**Your assembly point is ANYWHERE FAR AWAY FROM THE BUILDING.**
